Areolar tissue
Peritoneum

operation for radical
cure sewing pillars
of ring together
Epigastric artery inside
of ring, may be
done the outside
cut towards nose and
not go deeply
When constricted
may be able to
stretch

or cut very slightly
The constriction may
be about the peritoneum
may have to cut through
peritoneum

Reduction on bloc,
when any doubt the
best way is to cut
into the sac, to
be sure whether there
is constriction or
not

Infantile when
the parts are congen-
itally weak and
may go on till the
man is sixty and
yet be infantile
